Dear Sir/Madam,

Subject: Press **Release on Receipt of Orders from Transmission Corporation of Andhra Pradesh Limited (APTRANSCO)** aggregating to ₹ 523.21 crores

Ref: Regulation 30 SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

Dear Sir/Madam,

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we wish to inform that **Atlanta Electricals Limited** ("the Company") has received order from **Transmission Corporation of Andhra Pradesh Limited (APTRANSCO)** worth ₹ 523.21 crores (Net of GST). The orders comprise the supply of 95 units of 50 MVA 132/33 KV Power Transformers.

Please find enclosed a Press Release proposed to be issued in this regard. We request you to take the above on record and disseminate the information.

Thanking you,

Yours faithfully,
For Atlanta Electricals Limited

MEDIA RELEASE

Atlanta Electricals strengthens order book with Rs 523.21 crore APTRANSCO contract for 4,750 MVA transformer capacity

Company wins order for supply of 95 units of 50 MVA, 132/33 kV Power Transformers

Anand (Gujarat), November 25, 2026: Atlanta Electricals Limited (NSE, BSE: ATLANTAELE), a leading manufacturer of power transformers, has secured an order worth approximately Rs 523.21 crore from Transmission Corporation of Andhra Pradesh Limited (APTRANSCO) for the design, manufacture, testing and supply of power transformers.

As per the Letter of Intent received from APTRANSCO, the order comprises the supply of 95 units of 50 MVA, 132/33 kV Power Transformers, aggregating 4,750 MVA of transformation capacity, including 50 units under Lot-1 and 45 units under Lot-2, with an aggregate contract value of approximately Rs 523.21 crore, net of GST.

This order builds on Atlanta Electricals' existing engagement with APTRANSCO, following the Company's earlier order for the supply of transformers aggregating 3,120 MVA, valued at approximately Rs 270 crore, further strengthening its relationship with one of India's leading state transmission utilities.

"India's power sector continues to witness sustained investments in transmission infrastructure, driven by rising electricity demand. Utilities across the country are strengthening their transmission networks to ensure reliable and efficient power evacuation, creating significant opportunities for technologically advanced transformer solutions. This order from APTRANSCO reflects our longstanding partnership and reinforces Atlanta Electricals' commitment to supporting the development of resilient and future-ready transmission networks. We remain focused on delivering high-quality products and execution excellence as utilities undertake capacity expansion and network strengthening projects across the country," said Mr. Niral Patel, Chairman and Managing Director, Atlanta Electricals Limited.

The order has been awarded under Tender Specification No. PMM23-E-68/2026 and covers the design, manufacture, testing and supply of the transformers on a free-at-destination basis, including unloading, in accordance with the technical specifications and commercial terms stipulated by APTRANSCO. Deliveries are scheduled to commence within eight months from the date of the Letter of Intent, with subsequent supplies to be executed in a phased manner.

This order further strengthens Atlanta Electricals' presence in the domestic power transmission segment and reinforces its capability to execute large-scale transformer projects for leading transmission utilities. The addition of this order provides strong revenue visibility and reflecting the growing demand for transmission infrastructure investments across India.

About Atlanta Electricals Limited

Atlanta Electricals Limited manufactures and supplies a wide range of power transformers starting from 5 MVA/11 kV up to 500 MVA/765 kV, as well as auto transformers, inverter duty transformers, furnace transformers, generator transformers and special duty transformers in India, across its manufacturing facilities in Gujarat and Karnataka.

With over 30 years of experience and as of September 30, 2026, the Company has supplied 5,048 transformers aggregating 1,25,500 MVA across the country. Atlanta Electricals serves utilities,

industrial customers and infrastructure projects with technologically advanced transformer solutions that support India's growing power transmission and distribution network.
