Subject: Intimation Regarding Receipt of Revised Certificate under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

Reference: - Intimation for receiving a certificate under Regulation 30 of the SEBI (Listing obligations and Disclosure Requirements) Regulations, 2015 submitted on 29/10/2026.

Respected Sir/Madam,

With reference to the above-mentioned intimation submitted to the Exchange on 29/10/2026, we wish to inform you that the Company has received the revised certificate from BSCIC, a third-party assessment body accredited by the National Accreditation Board for Certification Bodies (NABCB).

In this regard, the details of the changes reflected in the revised certificate, as compared to the earlier certificate, are provided below:

Sr No.	Earlier Certificate	Revised Certificate
a.	Verification Opinion Number: GHG0006/0006/R1	Verification Opinion Number: GHG0006/0006/R2
b.	**Direct Emissions:** 0.219 tCO2e **Indirect Emissions:** 4871.420 tCO2e	**Direct Emissions:** 0.208 tCO2e **Indirect Emissions:** 5096.99 tCO2e
c.	Expiry Date: **30-Sept-2027**	Removed due to change in format.

We hereby submit the revised certificate, wherein the aforesaid changes are reflected on the certificate page and Page No. 3 of the certificate.

We further confirm that there are no other changes to the original intimation submitted to the Exchange, except for the changes specifically mentioned above.

The revised certificate is enclosed herewith for your information and records.

SCHEDULE-I

Brief Description of Verification Process:

BSCIC Certifications Pvt Ltd was engaged to conduct an independent verification of the greenhouse gas (GHG) emissions reported by **Master Components Limited (MCL)** for the Reporting Period of **1st January 2025 to 31st December 2025.** This Verification Statement applies to the related information included within the scope of work described below. The determination of the GHG emissions is the sole responsibility of MCL. BSCIC's sole responsibility was to provide independent verification on the accuracy of the GHG emissions reported, and on the underlying systems and processes used to collect, analyze and review the information. BSCIC is responsible for expressing an opinion on the GHG emissions statement based on the reasonable level of assurance verification.

Level of Assurance:

Reasonable

Scope:

The GHG statement that is being verified is MCL's GHG emission report for the period 1st January to 31st December 2025. The GHG emissions have been consolidated through control approach covering the site at Nashik.

The emissions are quantified and compiled from the production, maintenance and other relevant departments and are reported in terms of tonnes of carbon dioxide equivalent (tCO2e), using the Global Warming Potential (GWP) values prescribed by Intergovernmental Panel on Climate Change (JPCC), unless stated otherwise.

Objectives:

The objective of this verification is to provide independent, impartial, and evidence-based assurance of GHG emissions reported by MCL for the period 1st January to 31st December 2025. This verification is aimed to evaluate the accuracy, reliability, completeness and consistency of the GHG data and to determine whether the methodologies and assumptions used to calculate emissions is correct and appropriate in accordance with the requirements of ISO 14064-1:2018.

Verification Criteria:

ISO 14064 – 3: 2019; Specification with guidance for the verification and validation of greenhouse gas statements.

Materiality:

A qualitative and quantitative evaluation of any errors, limitations or misrepresentations has been undertaken. The verification team, using professional judgment, determined whether any qualitative/quantitative discrepancies could affect the overall GHG statement and, in turn, have a material impact on the decisions of the intended user. The materiality threshold is considered below or equal to 5% of the total inventory to provide reasonable level of assurance.

Verification Opinion:

Unmodified Opinion

Based on the data and information provided by Master Components Limited (MCL) and the process and procedures conducted, BSCIC concludes with reasonable assurance that there is no evidence the GHG emissions statement shown above:

- is not a fair representation of the GHG emissions data and information; and
- has not been prepared in accordance with the ISO 14064-1:2018 listed above.

In conclusion, BSCIC has verified Master Components Limited (MCL)'s GHG statement in accordance with ISO 14064-3 standard to a reasonable level of assurance. It is BSCIC's opinion that appropriate methodologies for calculations have been used and the GHG inventory result is of satisfactory accuracy subject to the boundary conditions that BSCIC has assessed.
