9.	Whether the order(s)/contract(s) would fall within related party transactions? If yes, whether the same is done at "arm's length"	Yes, the said order will fall within related party transaction. The same is being done on arm's length basis.

PRESS RELEASE **FOR IMMEDIATE RELEASE**

PATEL ENGINEERING HAS BEEN DECLARED LOWEST BIDDER (L1) FOR ₹ 1,441.04 CRORE GONGRI HYDRO POWER PROJECT (144 MW) IN ARUNACHAL PRADESH.

Mumbai, November 26, 2026: Patel Engineering Limited has been declared the lowest bidder (L1) by Dirang Energy Private Limited (DEPL), its wholly owned subsidiary, for the execution of the 144 MW (2 × 72 MW) Gongri Hydro Electric Project in West Kameng district, Arunachal Pradesh. The order value is ₹1,441.04 crore including GST, and the project is to be completed within a construction period of 48 months from the date of award.

DEPL is a special purpose company set up by Patel Engineering to develop this project. The project will be developed on a Build-Own-Operate-Transfer (BOOT) basis for a 40-year lease period.

The Gongri Hydro Electric Project is a run-of-the-river project proposed on the Gongri River, a tributary of the Bichom River in the Kameng basin, near Dirang town in West Kameng district.

The project has a design energy of 623.19 million units (MU) per year. This is the amount of electricity it is expected to generate in a year with 90% dependable water flow, with the plant available for 95% of the time.

The scope of work includes a diversion barrage with four radial gates to divert river water, intake structures, and two desilting chambers to remove silt from the water. A head race tunnel, 5.8 m in diameter and 7.1 km long, will carry the water towards the powerhouse. The project also includes a 13 m diameter surge shaft to manage water pressure, and a pressure shaft, 4.4 m in diameter and 647.26 m long, to feed the turbines. Other works include a surface powerhouse, a tail race channel that returns the used water to the river, and a switchyard. The scope also covers hydro-mechanical works and electro-mechanical works.

Commenting on the development, Ms. Kavita Shirvairkar, Managing Director, Patel Engineering said: "Executing the Gongri Hydro Electric Project allows us to apply our core engineering strengths directly to a strategic group asset. The 144 MW project will add clean, renewable power and support the development of Arunachal Pradesh. We are committed to delivering it safely, on time and to the highest standards."

About the company

Patel Engineering Ltd. ('PEL' or 'Company'), is a 77-year company established in the year 1949 and has a strong presence in hydropower, tunnelling and irrigation segments. The Company has a consistent track record in execution of projects in both domestic and international arena. PEL has completed over 85 dams, 40 hydroelectric projects and more than 300 km of tunnelling for clients which are mostly central PSUs or state government organizations.
