Encl. as above

Titagarh Rail Systems bags new order from JSW for 181 BFNSM1 wagons and 3 BVCM wagons.

Gets approval to manufacture auto carrier wagons expanding its product offering

Kolkata, 23 November, 2026: Titagarh Rail Systems Limited has further strengthened its position in the freight wagon industry by bagging an order from JSW(South) Rail Logistics Pvt Ltd. for INR. 77.09 crs.

In addition, it received route clearance from Indian railways to manufacture and despatch specialised auto carrier wagons which enable Titagarh to become one of the few wagon manufacturers to have the capability of producing all kind of Freight wagons from pressurised tank wagons to carry gas and petroleum products to carrying all kind of automobiles.

The approval from the railway authorities for the operation and movement of auto carrier wagons connects its Bharatpur Manufacturing Unit to the Dedicated Freight Corridor Corporation of India Limited (DFCCIL) network.

Automobile movement on rail has caught momentum recently and the market of auto carriers has been very buoyant over the last few months. In absence of this approval, Titagarh was unable to address this growing market segment in absence of this approval which Titagarh plans to get very actively engaged in doing based on the approval. Titagarh has also started taking steps to manufacture a prototype wagon for these auto carriers in order to offer shorter delivery timelines to the customers.

Commenting on the development, Shri Umesh Chowdhary, Vice Chairman & Managing Director, Titagarh Rail Systems Limited, said:

"The introduction of ACT wagons into our freight rolling stock portfolio marks another significant step towards broadening our product offerings and strengthening our capabilities in specialised freight solutions. With the approval for movement from our Bharatpur Manufacturing Unit to the DFCCIL network now in place, we are better positioned to enhance our manufacturing and delivery capabilities and contribute more meaningfully to the DFC network. We believe this will further strengthen the freight rail ecosystem, support greater efficiency in freight movement and contribute towards the national target of achieving 3,000 MT freight loading by 2027.

This development also reinforces our commitment to the vision of Make in India and Aatmanirbhar Bharat. We remain committed to supporting the Government's vision through the development and delivery of innovative, reliable and indigenously manufactured rolling stock solutions that contribute to the continued growth and modernisation of India's railway and freight infrastructure."

About Titagarh Rail Systems Limited

Titagarh Rail Systems is a leading comprehensive mobility solution provider with a strong presence in India. With state-of-the-art factories in the country, we are committed to meeting the diverse requirements of passenger and freight rolling stock. At Titagarh, we specialize in crafting cutting-edge transportation solutions, including semi high-speed trains, urban metros, passenger coaches, propulsion systems, and a wide array of wagons, including specialized ones.
