MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Industry Overview, Structure and Development:

Forging is traditionally considered as the back bone of the manufacturing industry. It is a major input to the sectors which support economic growth of the nation, such as Automobile, Industrial Machinery, Power, Construction & Mining Equipment, Railways and general engineering. The Indian forging industry is well recognized globally for its technical capabilities. With an installed capacity of around 38.5 lakh MT, Indian forging industry has a capacity to forge variety of raw materials like Carbon Steel, Alloy Steel, Stainless Steel, Super alloy, titanium, aluminum and so forth, as per the requirements of user industry.

Over the years, the Indian forging industry has evolved from being a labour-intensive industry to capital-intensive manufacturing sector. The current investment in the plant and machinery by Indian forging companies is worth of Rs. 27,833 Crore. Based on their installed capacity, the forging units may be classified as very large (capacity above 75,000 MT), Large (capacity above 30,000 to 75,000 MT), medium (capacity above 12,500 to 30,000 MT), small (capacity above 5,000 to 12,500 MT) and very small (capacity up to 5,000 MT). Based on this classification it is seen that about 83% of the total number of units are small and very small, while only about 8% can be classified as very large units; the balance of about 9% constitute the medium sized units.

The Indian forging industry is concentrated around its end user customer locations. Therefore, the major forging clusters are found to be in the states of Maharashtra, Punjab, Gujarat, Tamil Nadu, Haryana, Delhi, Karnataka, Jharkhand, West Bengal and Andhra Pradesh. The forging industry of India provides direct employment to about 95,000 people. The small and very small units are mainly dependant on manual lablour, however medium and large units are more mechanized. Quality standards in the industry have improved significantly and the sector is now well known globally for its high quality.

Forging Industry Backbone of the Automobile Industry:

- Current share of the Auto sector is about 58% of total forging production while the rest is with the other sector
- Changes in the Indian Automobile industry directly impact the Indian forging industry, because the forging components form the backbone of the Indian automobile industry

The industry is increasingly addressing opportunities arising out of the growing trend among global automotive OEM's (Original Equipment Manufacturers) to outsource components from manufacturers in low cost countries. As a result, the industry has been making significant contributions to country's growing exports.

In order to reduce the impact of cyclicality and dependence on auto sector, the industry plans to diversify into non-automotive sectors also.

Impacts and effects of the COVID 19 Pandemic:

The impact of the COVID-19 pandemic has created significant volatility in the global economy and led to reduced economic activity. The supply disruption caused by the novel coronavirus outbreak has severely hampered the forging and auto component manufacturing industry in India. China is a major supplier of automotive components and accounts for 27% of India's automotive component imports.

The ultimate impact of the pandemic on our business, results of operations and financial condition will depend on numerous evolving factors and future developments, including the ultimate duration, spread, severity and repetitiveness of the outbreak; the ultimate extent and duration of its effect on the global economy and how quickly and to what extent normal economic and operating conditions resume.

Meaning of Internal Financial Controls Over Financial Reporting:

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that; (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting:

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion:

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2021, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the Institute of Chartered Accountants of India.
