Allcargo Global Limited Monthly Operational Update

LCL operations:

- LCL volume stood at 667 thousand cubic meters in October 2026, down 3% year-on-year and month-on-month. The decline witnessed is linked to the gradual easing of peak season demand.
- Global fleet remains tied up due to port congestion, which is leading to pressure on capacity, which in turn has kept the rates well above same period last year.
- On a year-on-year basis volume increased across North America, while there was a decline in other regions.

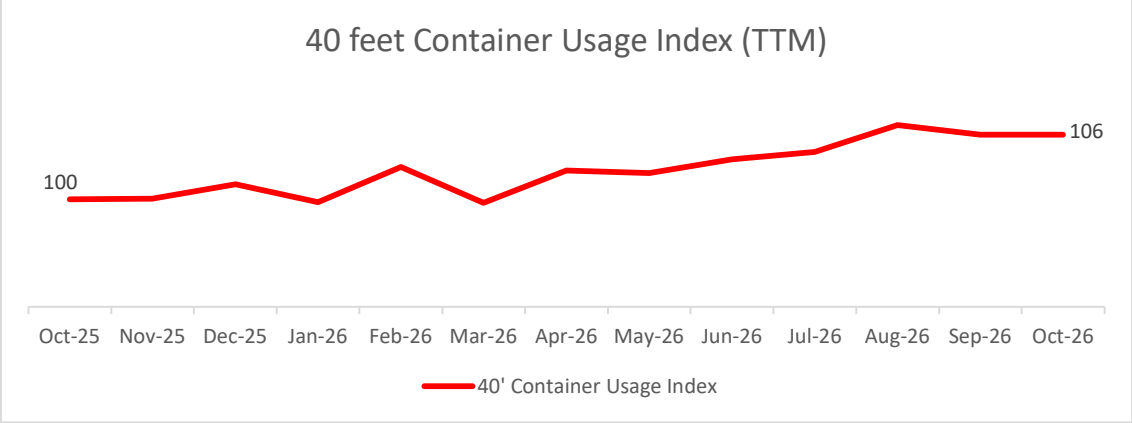

Container utilization: Driven by efficiency initiatives container utilization continues to show improvement over last year, despite lower volume.

Note: The Index shows Container utilization (CBM/TEU) levels rebased as October2025 = 100

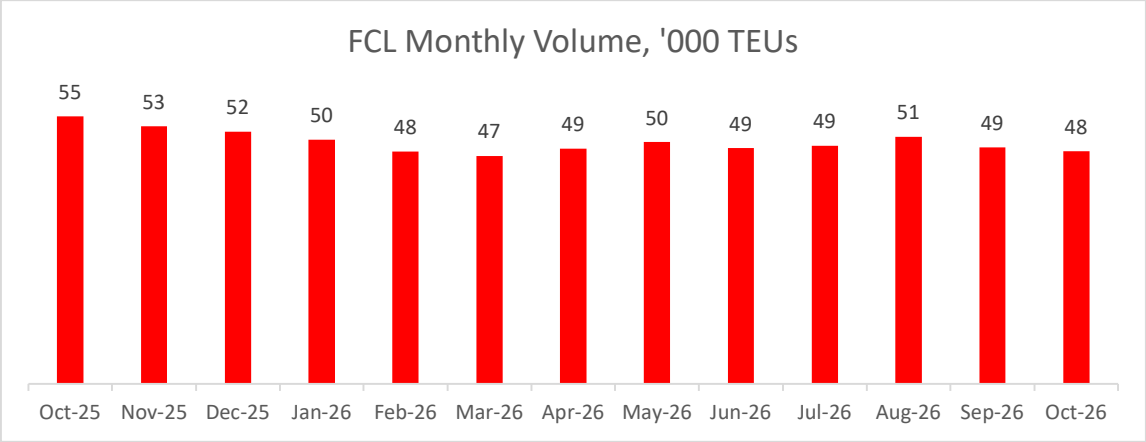

40 feet ratio: Strong trade lane management and sharp focus on profitability has resulted in consistently higher 40-foot container utilization, with utilization now significantly above the prior-year level.

Note: The Index shows 40 feet Container usage (number of 40 feet containers as % of total containers used) levels rebased as October 2025 = 100

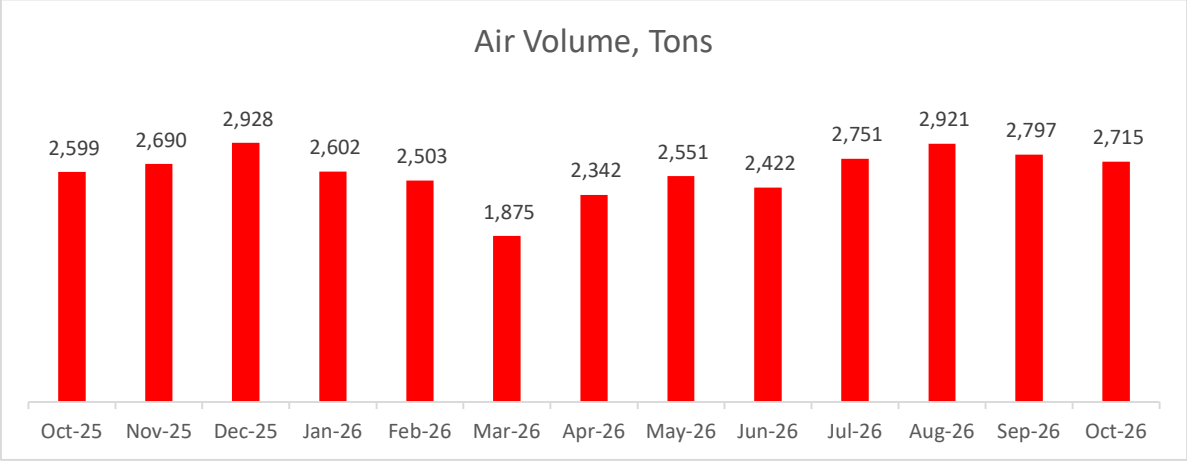

FCL operations:

- FCL volume during the month of October 2026 stood at 47,997 TEUs, down 13% over last year and 2% over last month.
- Geopolitical issues in the Middle East is a key contributor to the volume decline.
- On a year-on-year basis volume increased in Europe, while there was a decline in other regions.

Air operations:

- Air volume for the month of October 2026 stood at 2,715 tons. This represents a growth of 4% over last year and a decline of 3% over last month.
- Air volume witnessed year-on-year increase across Middle East and Europe, while there was a decline in other regions.
