Subject: Disclosure of Press Release dated November 18, 2026

Dear Sir/Madam,

ANI Integrated Services Limited ("the Company") is pleased to share Press Release dated November 18, 2026 and titled **"ANI Integrated Services: From Technical Expertise to an Integrated Engineering Platform"**.

Kindly take the above information on record.

The same is also available on the Company's website at https://aniintegratedservices.com.

Thanking you,
Yours faithfully,

For ANI Integrated Services Limited

Akshay Navin Korpe
Whole-time Director
DIN: 02201941
Address: 1 Sai Bunglow, Rajvilas Haveli Society,
Soham Gardens, Manpada, Ghodbunder Road,
Thane West, Maharashtra-400607

Date: November 18, 2026
Place: Thane

ANI Integrated Services: From Technical Expertise to an Integrated Engineering Platform

Three decades of capability building, 7,500+ professionals, 20+ countries and a business that has more than doubled its revenue since FY20

India's industrial and infrastructure landscape is undergoing significant expansion across sectors such as energy, infrastructure, renewables, data centres and advanced manufacturing. Supporting this growth is a large ecosystem of specialised engineering, technical manpower and project execution companies.

ANI Integrated Services Limited, with a legacy spanning more than 35 years, has steadily built its presence within this ecosystem.

Founded in 1989, ANI has evolved from its roots in technical manpower solutions into an integrated engineering and industrial services partner offering technical manpower deployment, engineering services, turnkey project execution and operations & maintenance (O&M).

Today, the company has 7,500+ technical professionals, 150+ clients and a presence across 20+ countries.

From Technical Manpower to Integrated Services

ANI's journey began with a focus on technical expertise and manpower solutions. Over the years, the company expanded its capabilities to include project execution, engineering services and O&M.

This evolution enabled ANI to participate across multiple stages of an industrial project's lifecycle—from engineering and site installation to commissioning, shutdown and post-warranty support.

The company's current positioning as a one-stop engineering and industrial services partner reflects this transformation.

Rather than being focused on a single service, ANI today combines manpower, engineering and execution capabilities to address a wider range of requirements for industrial customers, EPC contractors and project management consultants.

7,500+ Professionals: The People Behind the Projects

For an engineering and industrial services company, capability ultimately comes down to people.

ANI today has a technical workforce of **7,500+ professionals** deployed across diverse industrial environments.

These professionals support activities ranging from technical manpower deployment and engineering to installation, commissioning, maintenance and shutdown requirements.

The company's extensive manpower database, prompt personnel deployment capabilities and experience across industrial sectors allow it to respond to project requirements across geographies.

This becomes particularly important in industries where specialised technical manpower is critical to project timelines and operational continuity.

Over 35+ years, ANI has built experience across a wide range of industrial environments, creating a pool of domain knowledge that goes beyond simply providing manpower

From Oil & Gas to Data Centres and Semiconductors

ANI's sectoral presence has evolved alongside India's changing industrial requirements.

The company has established capabilities across traditional sectors such as Oil & Gas, Power, Chemicals, Metals and Infrastructure, while also expanding its exposure to emerging areas including Renewable Energy, Data Centres and Semiconductors.

This diversification allows ANI to participate across both established industrial ecosystems and newer areas of infrastructure investment.

Its project experience includes electrical and instrumentation works, engineering deputation, installation and commissioning, project management, shutdown maintenance and O&M services

From India to 20+ Countries

ANI's growth story has also been geographical.

What began as an India-focused business has expanded into international markets across the **Middle East, Africa and the Far East**, with the company now having a presence across **20+ countries**.

Its international footprint includes dedicated entities such as:

ANI Integrated Services Middle East FZE
Al Hamra Industrial Zone, Ras Al Khaimah, UAE

ANI Integrated Services Pan Africa Ltd
Lagos, Nigeria

ANI Integrated Global Services LLC
Georgetown, Guyana

The company has also undertaken projects and manpower assignments across markets including the UAE, Saudi Arabia, Nigeria, Thailand and other overseas locations.

The international expansion has helped ANI take its technical expertise into different industrial environments while diversifying its geographic reach.

20+ countries | 150+ clients | 7,500+ professionals

The Financial Transformation

The expansion in capabilities and geographic reach has been accompanied by a significant increase in the company's financial scale.

ANI's sales have grown from **₹109 crore in FY20 to ₹254 crore in FY26**.

Revenue has increased more than 2.3x in six years

FY20: ₹109 Cr
↓
FY22: ₹144 Cr
↓
FY24: ₹188 Cr
↓
FY25: ₹227 Cr
↓
FY26: ₹254 Cr

This represents an approximate **15% CAGR in revenue between FY20 and FY26**.

The financial journey also demonstrates that ANI has had periods of both expansion and margin volatility.

In FY20, the company reported an operating loss of approximately ₹1 crore. By FY25, operating profit had increased to **₹14 crore**, with an operating margin of approximately **6%**.

FY25 was also a strong year in terms of bottom-line performance, with approximately **₹9 crore of net profit**.

For ANI, therefore, the longer-term financial story is not simply one of linear profitability expansion. It is a story of **significant business-scale creation**, accompanied by ongoing investments and operating requirements as the company expands.

Execution at the Core

Industrial services are execution-driven businesses where safety, quality, technical expertise and compliance are critical.

ANI's operating framework focuses on end-to-end services, agile project execution, HSE and quality, subject matter expertise, statutory compliance and prompt personnel deployment.

The company is ISO 9001:2015 certified and has also received safety-related recognition, including safe man-hours certifications and awards from major industrial customers.

These capabilities form an important part of ANI's proposition as it works across complex industrial environments.

A Leadership Built Around Long-Term Experience

ANI's growth has been supported by a leadership team with significant industry and operational experience.

Navin Nandkumar Korpe, Chairman & Managing Director, is an Instrumentation Engineer with more than 36 years of project and industry experience and has played a central role in building the company.

Akshay Navin Korpe, Executive Director, brings more than 15 years of Oil & Gas experience, including offshore and onshore operations.

Kedar Navin Korpe, Director & CFO, has more than six years of experience in finance and operations, with a focus on financial planning and operational efficiency.

Anita Navin Korpe, Non-Executive Director, brings more than 23 years of experience in office administration.

The leadership combines long-standing industry experience with the next generation taking on increasing operational and financial responsibilities.

What the ANI Story Represents

The ANI story is ultimately not about one particular order, one particular sector or one particular year of financial performance.

It is about **capability accumulation**.

Over more than 35 years, the company has built:

People
7,500+ technical professionals

Customers
150+ clients

Geographic reach
20+ countries

Capabilities
Manpower | Engineering | Turnkey Projects | O&M

Sector exposure
Oil & Gas | Power | Infrastructure | Chemicals | Metals | Renewables | Data Centres | Semiconductors

Financial scale
₹109 crore FY20 revenue → ₹254 crore FY26 revenue

The Next Chapter

India's industrial and infrastructure investment cycle is creating opportunities across both traditional and emerging sectors.

Oil & Gas, Power and Infrastructure continue to require engineering and technical expertise, while investments in **renewable energy, data centres and semiconductor infrastructure** are creating new requirements for specialised engineering and technical services.

ANI enters this next phase with a platform built over more than three decades.

The company has expanded its workforce, broadened its service offerings, entered international markets and increased its financial scale. Its evolution from technical manpower solutions toward integrated engineering and industrial services has created a broader platform from which to participate in India's expanding industrial ecosystem.

The next phase of ANI's journey will therefore be about how effectively it can **scale this established platform, deepen its capabilities and convert its expanding footprint into sustainable growth.**
