3. Expansion into Interactive Flat Panels: Commercialised 65-inch, 75-inch and 86-inch Interactive Flat Panel Displays, strengthening its presence in the digital education and interactive display segments.

Commenting on the financial performance and operating highlights, Mr. Ankit Jain, Chief Financial Officer and Executive Director, said,

"We are pleased with the performance delivered during the first half of FY27. Our focus has been on strengthening the business across multiple fronts, from expanding our product portfolio and manufacturing capabilities to building a stronger market presence. We believe these efforts are creating a solid foundation for our next phase of growth.

An important part of our strategy is to build STARSHINE into a more recognised consumer brand. Following the appointment of Vicky Kaushal as our brand ambassador, ***we commenced our full-fledged marketing campaign during Navratri. This is being supported by advertisements in The Times of India and other media platforms, alongside wider marketing initiatives.*** *We believe these efforts will help strengthen brand visibility, improve consumer recall and complement our expanding distribution network.*

Our business has historically been weighted towards the second half of the financial year, with H1 typically contributing around 35–40% of annual revenue. With ₹85.48 crore of revenue already achieved in H1FY27, we remain confident of surpassing ₹200 crore in revenue for the full financial year. The upcoming H2 period, supported by the stronger seasonal demand cycle for our products, provides us with an important opportunity to build on the momentum achieved so far.

While we remain conscious of the need to balance growth with profitability, our focus continues to be on improving operational efficiencies, strengthening our cost structure and progressively improving margins as the business scales. With increasing brand investments, encouraging demand trends and a wider product portfolio, we believe Arham is well positioned to capture the opportunities emerging in India's consumer electronics market."
