Dear Sir/Madam,

Sub: Press Release

Please find enclosed a Press Release titled "Cyient Semiconductors Secures Strategic Investment from GlobalFoundries.

This is for your information and records.

Thanking you,

Yours faithfully
For Cyient Limited

PRESS RELEASE

Cyient Semiconductors Secures Strategic Investment from GlobalFoundries

Hyderabad, India - November 19, 2026: Cyient Semiconductors, a global semiconductor company specializing in custom silicon solutions, announced that it has approved a USD 10 million strategic equity investment by GlobalFoundries (GF), a leading manufacturer of essential semiconductors, enabling AI at scale from the cloud to the physical world. The transaction will be executed at the same pre-money equity valuation of USD 490 million as the Cyient Semiconductors' recent financing round led by Edelweiss, resulting in a combined post-money equity valuation of USD 510 million.

The investment marks a significant milestone in Cyient Semiconductors' growth journey and reflects growing confidence in the company's strategy, execution, and long-term market opportunity. Through this investment, Cyient Semiconductors aims to expand its turnkey custom ASIC capabilities and accelerate custom silicon development and strengthen long-term wafer supply assurance and supply chain resilience.

The investment comes at a pivotal time for India's semiconductor industry as government and industry-led initiatives continue to strengthen the country's position within the global semiconductor value chain. Cyient Semiconductors is well-positioned to contribute to this momentum through advanced semiconductor design, product development, and intellectual property creation from India for global markets.

"This investment is a strong validation of our vision and the opportunity ahead for semiconductor innovation from India. We believe India has the talent, technical depth, and ecosystem momentum to become a significant force in the global semiconductor industry. Our ambition is to build a world-class semiconductor company from India that develops differentiated custom silicon for global markets.

This investment will help us accelerate innovation, strengthen our engineering capabilities and scale our global customer engagements as we execute on our long-term growth strategy. Having a leading semiconductor ecosystem partner as a strategic investor validates our technology and business model, accelerates our access to advanced manufacturing capabilities, and strengthens our ability to deliver custom silicon and power products globally," said, **Suman Narayan, CEO, Cyient Semiconductors**

Cyient Semiconductors is focused on delivering custom silicon solutions to customers across automotive, industrial, AI, communications, and data center markets. Through its end-to-end capabilities spanning chip architecture, design, semiconductor manufacturing, packaging, testing, qualification, and supply chain management, the company enables customers to accelerate innovation and bring differentiated semiconductor products to market faster.

About Cyient Semiconductors

Cyient Semiconductors is a Hyderabad-headquartered provider of custom ASIC/ASSP solutions, with a focus on analog mixed-signal, intelligent power, and advanced semiconductor platforms. With design centers in India, Belgium, and the U.S., Cyient Semiconductors enables global customers in data centers, robotics, automotive, and industrial automation to achieve higher efficiency and faster time-to-market.

Forward-Looking Statements

Certain statements made in the press release that are not based on historical facts may be forward-looking statements within the meaning of applicable laws and regulations. Such forward-looking statements are subject to risks, uncertainties, and assumptions, like significant changes in the economic environment in India and overseas, regulatory and tax laws, import duties, litigation, labor relations and other factors beyond the Company's control. Actual results may differ materially from those expressed or implied.

Cyient Semiconductors undertakes no obligation to publicly update or revise these forward-looking statements, whether as a result of new information, future events, or otherwise, except as required under applicable law.
