Notes:

1 The above unaudited standalone financial results have been reviewed by the audit committee and taken on record by Boad of Directors at their meeting held on November 14, 2026. The statutory auditors have carried out limited review of the financial results of the company for the quarter ended September 30, 2026 under regulation 33 of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015 as amended.

2 The above results are prepared in accordance with the recognition and measurement principles laid down and specified in Section 133 of the Companies Act, 2013 read with relevant rules framed thereunder and as per requirement of Regulation 33 of SEBI (LODR) Regulations, 2015 and according to applicable circulars issued by SEBI from time to time.

3 During the financial year ended March 31, 2025, the business premises of the Company had been searched by the GST Authorities in connection with some information in their possession. As a result of the search, the GST Authorities had alleged that the Company had claimed fraudulent ineligible input credit of GST in earlier years and accordingly, passed an Order under Section 74 of the CGST Act, 2017 dated January 16, 2025 directing the Company to deposit the ineligible input credit of GST amounting to Rs 96.14 crores along with interest of Rs 98.42 crores and penalty aggregating to Rs 96.14 crores aggregating to total demand of Rs. 290.70 crores.

The Management is of the strong view that the Company had legitimately availed the GST input credit and that the allegation made by the GST Authorities is not tenable. The Management has filed an appeal before the appellate authority. In the opinion of the Management, based on the facts and circumstances of the case, the full documentary evidence of entitlement to the input credit, and legal advice obtained, this liability will not crystallize. Accordingly, no provision for this liability has been considered necessary in these accounts.

Further during the financial year ended March 31, 2026, Income Tax Authorities had also raised a demand of Rs 10.68 crore. The management is seeking legal recourse against the said demand and in this regard, management has filed an appeal before the appropriate authorities for deletion of the entire demad raised.

4 The Company has identified "Manufacturing and trading of Copper Wires" as the single operating segment for the continued operations in the standalone financial results as per Ind AS 108- Operating Segments.

5 The Company is not having any subsidiary, associate or joint venture; therefore it has prepared only standalone results as consolidated requirement is not applicable to the Company.

6 Pursuant to the notification of the 'New Labour Codes' as issued in November 2025, the Company reassessed its employee benefit obligations in accordance with the revised definition of wages and accordingly, an incremental liability of Rs 4 lakhs had been disclosed as an "Exceptional Item" in financial year 2025-26.

7 The figures of the previous periods have been regrouped/rearranged/ and / or recast wherever found necessary to make them comparable.

Andhra's ₹25K cr space city near Sriharikota launch-ready

SHINE JACOB
Visakhapatnam, 15 November

Hardly 40-60 kilometres (kms) away from India's iconic launch pad at Sriharikota, Andhra Pradesh is gearing up to come up with a ₹25,000 crore space city spread across Sri Sathya Sai and Tirupati, to create an ecosystem for India's upcoming private sector space technology startups and micro, small and medium enterprises (MSMEs).

The state is targeting a private sector manufacturing hub closer to Sriharikota. At the 31st CII Partnership Summit late last week, the state signed deals to the tune of ₹1,800 crore, which include rocket engine making, testing and propulsion research and development (R&D). Major companies that signed deals include Astrobase Space Technologies, Bellatrix Aerospace, Agnikul Cosmos, and Hathor Rockets. This comes as states like Karnataka, Tamil Nadu, Gujarat, and Telangana are also nurturing plans for space cities and manufacturing parks.

"The state wants vertical and horizontal integration, which means bringing component suppliers for rocket makers into one ecosystem. Most of those suppliers are MSMEs," said Nara Lokesh, Minister for Human Resources Development, IT, Electronics and Communications, Andhra Pradesh. Incentives alone don't build an ecosystem. Speed is Andhra Pradesh's edge, along with Centres of Excellence for testing and certification, he added.

Early this year, Andhra Pradesh and Karnataka had a public tug-of-war after Lokesh invited space-tech startup Pixxel cofounder Kshitij Khandelwal, who was struggling to find land in Karnataka, to set up his unit in Andhra Pradesh. Government sources maintain Andhra Pradesh is already way ahead of its rivals in building a space ecosystem.

Take the case of Astrobase Space Technologies. Last week, the company proposed an ₹800 crore investment to expand its commercial rocket engine test facility at Thimmasamudram in Sri Sathya Sai district. It is expanding its rocket testing infrastructure to approximately 360 acres, by adding 339 acres to its existing facility in Andhra Pradesh. The scale up will strengthen the company's capabilities across critical stages of launch vehicle development, testing and validation, with a strong focus on advancing next generation reusable launch vehicle technologies. It also promises 500 direct jobs by December 2030.

Astrobase Space Tech's upcoming unit in Andhra Pradesh's Sri Sathya Sai District

Project line up

- Astrobase Space Tech proposed an ₹800 crore investment to expand its commercial rocket engine test facility
- Agnikul Cosmos to come up with a ₹510 crore facility for rocket launches and orbital data centre manufacturing
- Hathor Rockets will set up a ₹250 crore rocket engine manufacturing, testing and R&D facility

"At Astrobase, we are working towards building the capability to transport 1,000 tonnes of payload to space annually from Indian soil. We are committed to contributing to India's space ambitions by developing advanced launch systems and building the capabilities that can position the country as a leading force in the global space transportation ecosystem. Andhra Pradesh will be an important partner in advancing this vision," said Neeraj Khandelwal, chief executive officer (CEO) of the company, after signing the deal last week.

A short drive away, at Lepakshi, Bellatrix Aerospace plans an advanced programmes centre for satellites and propulsion. The project is worth ₹550 crore on 120 acres, with 565 jobs by December 2030.

Chennai-based Agnikul Cosmos, which made history in May 2024 by lifting off its Agnibaan SOrTeD mission from India's first privately operated launchpad at Sriharikota, is also planning to come up with a ₹510 crore facility for rocket launches and orbital data centre manufacturing in the space city. "This will be one of the first such dedicated manufacturing units in Asia or Europe to build orbital data centre units," said Srinath Ravichandran, cofounder and CEO of Agnikul.

In Tirupati district, Hathor Rockets will set up a rocket engine manufacturing, testing and R&D facility at Routhusuramala. The ₹250-crore project on 100 acres covers liquid engines for launch vehicles, in-space mobility and strategic defence, with 200 jobs by December 2031.

The new projects join Skyroot Aerospace, an earlier anchor at the state's AP Space City in Tirupati, where the state has allotted 294.67 acres for a ₹400 crore investment. "Put together, the map is compact. Engines get built near Tirupati, tested and checked for reuse at Thimmasamudram, and propulsion systems get developed at Lepakshi. All of it sits on the Hyderabad–Bengaluru corridor and within reach of Sriharikota," a government source said.

The state was one of the first in India to have a dedicated space policy through Andhra Pradesh Space Policy 4.0 (2025–30), with a ₹100 crore SpaceTech Fund.
