CALLS FOR A LONG-TERM PLAN TO STOP POLLUTING VEHICLES AT THE BORDER

SC: We want only BS-VI cars in Delhi

PRESS TRUST OF INDIA
New Delhi, November 23

THE SUPREME COURT on Monday said it was considering allowing only BS-VI vehicles in the national capital, as it expressed concern over the recurring air pollution crisis in Delhi-NCR during a hearing on air pollution.

A bench comprising Chief Justice Surya Kant and Justices Joymalya Bagchi and V Mohana was hearing a suo motu case examining the regulatory framework governing air pollution.

"We are clear; we want only BS6 vehicles in Delhi, if not NCR," Justice Bagchi remarked during the hearing.

BS-VI (Bharat Stage 6) vehicles are motor vehicles manufactured, sold and registered in India that comply with strict emission standards introduced on April 1, 2020. They align closely with Euro VI norms and significantly cut harmful exhaust pollutants compared to older BS-IV vehicles.

An anti-smog gun sprays water to curb air pollution as security personnel stand deployed along a smog-shrouded Kartavya Path near India Gate in New Delhi on Monday ANI

The top court also stressed the need for a long-term plan to prevent polluting commercial vehicles from entering Delhi while ensuring uninterrupted supplies of essential commodities.

"Why not (and) how to ensure that commercial vehicles don't enter Delhi at all? But it does not mean that Delhi people don't require (those). They have a lot of necessities. They require vegetables, fruits, other day-to-day items. So, everything will have to be available. So what can be the alternative? Can there be something that at the border, some warehouse so that you have some other battery-operated vehicles or non-polluting vehicles to bring them inside the city. This kind of arrangement may not be possible this year, may not be possible next year. But why not have this during five years. To ensure that no single commercial vehicle enters Delhi," the CJI remarked.

During the brief hearing, the apex court also sought accountability from NCR states over the issue of air pollution and questioned why they were not actively participating in this process.

It directed Haryana, Punjab, Uttar Pradesh and other states concerned to file status reports detailing steps taken to reduce particulate pollution across the NCR.

Expressing serious concern over the recurring air pollution crisis in Delhi-NCR, the top court had earlier termed vehicular emissions a major contributor to the deteriorating air quality and asked authorities why the air quality index continues to remain alarming despite several regulatory measures.

The bench had highlighted the large number of vehicles plying on roads connecting Delhi with neighbouring areas, including Ghaziabad. Greater Noida, Gurugram and Faridabad.

Govt tightens mine closure norms, speeds up refunds

SAURAV ANAND
New Delhi, November 23

THE CENTRE HAS introduced stricter financial safeguards for coal and lignite mine closures, including suspension of mining plans for prolonged failure to deposit rehabilitation funds, while easing approval procedures and mandating faster reimbursement of closure expenditure, under new guidelines aimed at accelerating mine development and strengthening environmental compliance.

The guidelines, issued by the coal ministry on November 20, will come into force after 30 days and apply to coal and lignite blocks, including those operated by public sector companies and commercial miners.

Under the revised framework, mine operators must deposit closure funds into escrow accounts, with base rates fixed at ₹14 lakh per hectare for opencast mines and ₹2 lakh per hectare for underground mines.

The rates are linked to the wholesale price index, while annual contributions will escalate by 5%.

Delays in depositing the prescribed amount will attract interest of 1% per month.

If dues remain unpaid beyond December 31 of the subsequent financial year, the Coal Controller will suspend the mining plan.

Continued non-payment for six months after suspension could lead to withdrawal of approval.

The ministry has simultaneously shortened the reimbursement process, requiring the coal controller to allow withdrawal of eligible mine-closure expenditure within one month of receiving claims, subject to verification provisions.

Mine operators can claim reimbursement of up to 50% of the previous year's deposited amount against completed closure work, based on self-certification and supporting evidence.

The coal controller may test-check up to 5% of claims.

Imported urea gains cost..

THE DEVELOPMENT POSES a short-term challenge to the government's push for self-reliance in urea production. But analysts hope this could be a short-term phenomenon caused by the supply disruptions after the West Asia war.

While India traditionally used to import urea from Oman, China, Russia, Qatar and Saudi Arabia, it has had to shift to alternative sources like Egypt, Nigeria, Algeria, Indonesia and Vietnam owing to the supply constraints caused by the Strait of Hormuz crisis.

At the same time, reduced supplies of LNG, primarily after Qatar gas became out of bounds in the wake of the war, caused its prices to surge.

From $18/Metric Million British Thermal Unit (mmBtu) in May, the cost of US LNG delivered as gas at key fertiliser stations rose to $31/mmBtu in October.

India's annual urea consumption is 40 million tonne which is distributed to farmers at heavily subsidised prices (the retail price is just 6.5% of the cost). A fifth of the requirement is met by imports.

Siba Prasad Mohanty, managing director, Hindustran Urvarak & Rasayan, said, "There is a need to balance cheaper imports with protecting the domestic industry hit by higher production costs due to costlier US gas."

Prior to the West Asia war, Qatar used to supply over 45% of India's LNG imports, but deliveries fell sharply after force majeure in March, 2026. To boost LNG supplies, the government started to purchase LNG from spot markets from countries such as Australia, Russia and the US.

With easing supplies and diversified imports, the landed cost of urea has declined by around 62% to $362/tonne last month, down from a peak of $947/tonne in May 2026. The global price of urea dropped 17% in October year-on-year, according to the Department of Fertilisers.

The fall in global urea prices has been rather sharp since China lifted restrictions on urea exports, thus easing global supplies.

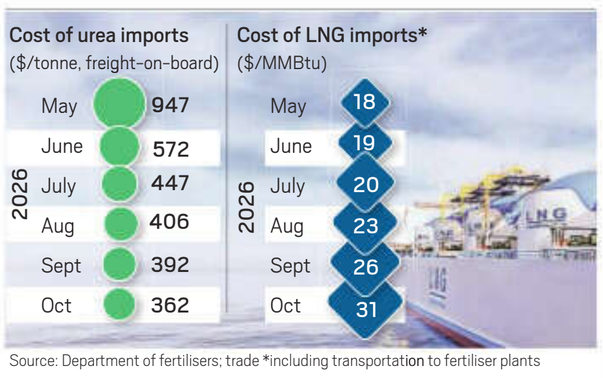

As per Fertiliser Association of India data, the country's urea imports increased 23% to 7.2 million tonne (MT) during April-October this fiscal, up from 5.86 MT compared to the same period last fiscal.

In FY26, India produced close to 30 MT of urea, while around 9.64 MT of the key soil nutrient was imported. The consumption of all fertiliser variants such as urea, DAP, potash and NPKs was around 70 MT last fiscal. Industry officials said that they have urged the government to allow domestic urea plants to operate at 90% capacity, warning that cutting production could create uncertainties given China's past record of restricting exports.

The government and fertiliser industry are aiming to achieve self-reliance in urea production by 2031. About 80% of urea production in the country uses LNG, while the rest uses domestic gas. At present, 30 out of 32 urea units use natural gas as feedstock.

Urea continues to be sold at ₹266.50 per 45 kg bag against global prices exceeding ₹4,000 a bag. This price has remained unchanged since March 2018.

Tata Steel...

THE COMPANY WILL acquire the promoters' entire 26.6% stake for ₹15,510 crore and make an open offer for an additional 26% at ₹2,301.40 per share, entailing a potential outlay of ₹16,756 crore. The transactions are expected to be completed within FY27, subject to regulatory approvals.

The transaction will consolidate Tata Steel's 1.7 million tonne per annum (MTPA) steel tubes business and 800,000 tonne of surface-coated coil capacity with APL Apollo's existing 5 MTPA capacity. The combined entity will initially have downstream capacity of around 7.5 MTPA.

For Tata Steel, APL Apollo will serve as a platform to accelerate its downstream expansion by leveraging the latter's manufacturing footprint, distribution network, product portfolio and operating efficiencies. The management said APL Apollo's scale in steel tubes, lean operating structure and pan-India presence made it a suitable vehicle to consolidate and expand the businesses rather than operate them separately.

The transaction will also expand Tata Steel's downstream portfolio across structural tubes, pipes and colour-coated products. "Our downstream portfolio increases from 35% of our volumes in India to about 55% of our volumes. We have a target of 70%. So, we are moving well in that direction," Managing Director and Chief Executive TV Narendran said.

The company plans to expand its steel tubes capacity by another 3 MTPA and build 5 MTPA of colour-coated capacity through an exclusive contract manufacturing arrangement with SG Tech Engineering, an entity associated with APL Apollo's promoter group.

The first 1 MTPA of colour-coated capacity is expected to be commissioned within 24 months.

The combined downstream platform is targeting capacity of 15.5 MTPA by 2035, comprising around 9 MTPA of tubes and 6.5 MTPA of colour-coated products.

Huang back as Nvidia CEO

THE BOARD SAID that, after receiving input from senior US government officials, it saw no national security risk from his return.

The reversal underscores Huang's deep influence over Nvidia and raises questions about how dependent one of the world's most valuable companies remains on its co-founder.

Just last week, Nvidia Chairman Harvey Jones had said that the company would not rehire Huang over disclosure of personal behavior inconsistent with the company's code of conduct, standards, and cultural norms, despite a growing campaign for his return, after the board appointed CFO Colette Kress as interim CEO.

Huang resigned on November 12 following revelations of the extramarital affairs, dealing a massive blow to the AI trade, in which he has emerged as one of the most prominent faces.

His reinstatement sent ripples across the sector, with Nvidia set to add some $900 billion to its market value. It also lifted broader markets, with the chipmaker's surge boosting semiconductor and neocloud stocks exposed to the AI boom.

Fares climb, losses soar...

SOME SUPPORT HAS come from the government's ECGLS liquidity scheme and from VAT cuts on ATF in some states.

The outlook offers little comfort. Icra had forecast 3-6% domestic traffic growth for FY27, with a possible downward bias.

Raising fares further is risky at a time when passenger traffic is already slipping. Higher yields can keep revenue growing, but they cannot fully absorb fuel and currency shocks. For airlines, the challenge is no longer filling seats. It is making each seat pay.

NOTICE OF REGISTRATION OF THE ORDER AND MINUTES CONFIRMING REDUCTION OF SECURITIES PREMIUM ACCOUNT

Notice is hereby given that the Hon'ble National Company Law Tribunal, Division Bench, Court-I, Ahmedabad by its Order pronounced on 4th November, 2026 in the above Company Petition, has confirmed the reduction of the Securities Premium Account of the above-named Company from Rs. 1,650.91 Crores to Rs. 212.12 Crores, i.e. a reduction of Rs. 1,438.79 Crores. The reduction is effected by setting off the said amount against the accumulated losses (debit balance in retained earnings) of an equivalent amount, as approved by the members by Special Resolution passed at the Extra-Ordinary General Meeting held on 26th March, 2026.

The certified copy of the said Order and the Minute approved by the Tribunal were registered by the Registrar of Companies, Gujarat, on Friday, November 20, 2026.

The said Minute in words and figures is as follows:

"The Securities Premium Account to the extent of Rs. 1438.79 crores is reduced, cancelled and written off against the negative balance of accumulated losses to the extent of Rs. 1438.79 crores."

FURTHER, approved reduction, cancellation and writing off the Securities Premium Account would not prejudice the interests of its creditors, as it does not entail any reduction in the amounts payable to them, nor does it contemplate any compromise or arrangement with the creditors and does not impair the Company's financial ability to discharge its existing obligations or meet its debts and commitments in the ordinary course of business.

FURTHER, the said reduction is purely an internal capital restructuring of Arvind Lifestyle Brands Limited , involving only an adjustment between the securities premium account and the accumulated losses within its other equity. It does not affect the net worth of Arvind Lifestyle Brands Limited and has no implication on the consolidated financial numbers of Arvind Fashions Limited.
