**Hexaware Renews Microsoft Azure Expert Managed Service Provider-Specialization for Fourth Year**

*A mark of sustained client trust in end-to-end cloud expertise*

**Thursday, Nov 19, 2026:** Hexaware Technologies [NSE: HEXT], an AI-first digital and IT services company, today announced that it has renewed its Microsoft Azure Expert Managed Service Provider (MSP) accreditation following a full audit in 2026.

With this renewal, Hexaware enters its fourth cumulative year as an Azure Expert MSP, following a rigorous 300+ hour assessment and two-day third-party audit spanning 30 clients across its Microsoft services portfolio and assessing its capabilities to design, operate, manage, and continuously improve complex Azure environments at enterprise scale.

As part of its Azure Expert MSP journey, Hexaware showcased Tensai®, its intelligent automation platform, demonstrating how automation and AI can transform cloud operations through proactive monitoring, intelligent insights, automated remediation, and improved operational efficiency. Tensai® enables 300% faster release velocity, 4X reduction in QA cycles, and 3X higher user satisfaction.
Hexaware also holds the Microsoft Specialization in AI Apps on Microsoft Azure, with growing recognition for its expertise in designing, developing, and deploying enterprise-grade AI applications on Azure, and its ability to accelerate AI experimentation to production at scale.

Building on these capabilities, Tensai® powers Hexaware's end-to-end security solution for Azure and Microsoft 365. As a member of the Microsoft Intelligent Security Association (MISA), Hexaware combines this security expertise with Microsoft Security technology to support Zero Trust and strengthen cyber resilience.

Beyond its Azure Expert MSP recognition, Hexaware also holds all six Microsoft Solutions Partner designations—Modern Work, Business Applications, Security, Digital & App Innovation (Azure), Data & AI (Azure), and Infrastructure (Azure)—along with newly added advanced specializations in intelligent automation, cloud security, and threat protection.

"This renewal is a strong reflection of the trust our clients place in Hexaware's growing Microsoft services and AI capabilities," said **Eravi Gopan, President Global Head - Technology, Products, Platforms & Strategic Partnerships, Hexaware**. "With a wide portfolio across industries, we are able to bring more value from the versatile cloud experiences available through Microsoft and help customers continuously improve how they operate and evolve on Azure."

These credentials demonstrate the breadth and depth of Hexaware's Microsoft expertise and its ability to deliver cloud transformation and managed services at scale.

“The Microsoft Azure Expert MSP program was designed to validate and recognize our most accomplished and qualified partners to drive growth for customers,” said Andrew Smith, GM of Partner GTM, Programs and Experiences at Microsoft. “Hexaware has once again demonstrated its Microsoft Azure expertise and commitment to service excellence, so we are pleased to again recognize it as a Microsoft Azure Expert MSP.”

**About Hexaware**

Hexaware is a global technology and business process services company driven by a singular purpose: to create smiles through great people and technology. Our Zero Friction Enterprise™ approach combines AI innovation with human expertise to remove the technological and operational barriers that slow business progress. Globally, we help enterprises reduce complexity, accelerate transformation, and create lasting business value. Learn more about Hexaware at https://hexaware.com.
