Note: 1. Profitability was impacted by mark-to-market movements in our treasury investments
2. EBITDA is calculated excluding Other Income.

Commenting on the performance Mr. Yogesh Kajaria, Chairman and Managing Director said: *"We are pleased to report a healthy performance driven by strong execution, including the fulfilment of North American shipments supported by the effective and efficient management of our supply chain.*

The demand environment remains encouraging, supported by improving activity across the commodity and mining sectors. Our geographic diversification efforts are also gaining momentum, particularly in the European markets, where we are making progress with key customers. Given the extended qualification cycles in our industry, successful product trials can translate into meaningful and recurring business over the long term.

Innovation continues to be an important pillar of our growth strategy. Mineplast Pro, developed through our R&D efforts, is gaining traction across newer applications and has enabled our entry into the new mining segments, which has traditionally relied on rubber conveyor belts.

Looking ahead, with a healthy order book and increasing international penetration we remain focused on strengthening our presence in existing markets, expanding into new geographies and enhancing our product portfolio. Our priorities remain sustainable growth, operational excellence, margin resilience and long-term value creation for all stakeholders."
